

CONVERGENCE
A Definite Solution

Automated lab scale Fluid handling Systems

Convergence designs and builds custom laboratory equipment and is especially strong in the field of fluid handling and membranes. From one of a kind device up to small series production of your lab equipment, Convergence can do the job.

Convergence offers complete plug and play systems where user friendly and compact design are the two main goals, resulting in high quality lab systems specifically designed to the customer's wishes.

All our devices come with full support and software upgrades to ensure trouble free and stable operation of your experimentation.
