

## Water and Agriculture in Israel

### Professional tours and continuing education courses

The State of Israel is a world leader in the fields of water management and agriculture. Israel's water and agriculture industries have made remarkable achievements by virtue of their advanced technologies and applied R&D.

**RTS Water Ways Ltd** provides comprehensive professional training and sightseeing services on water and agriculture. These services are intended for professionals, organizations, institutions individuals, groups and companies in Israel and abroad.

**Our services include the coordinating of guided field trips and a professional continuing education course on topics of water and agriculture in varies languages.**

The RTS Water Ways Ltd team is comprised of experts, former senior officeholders, and high-caliber professionals encompassing a wide range of topics in the fields of water and agriculture. Our staff members are knowledgeable about Israel's water resources and have direct access to politicians and officials of the water and agriculture establishment and maintain ongoing working relations with the institutions, organizations and companies in these fields. Details on our tours can be found on the next page or in our company website: [www.rts-water.com](http://www.rts-water.com).
