EuroMed 2010

EXHIBITION

Desalination and Wastewater Reuse Equipment and Services

**Alongside the 6th EuroMed conference
organized by the European Desalination Society**

3–6 October 2010, Tel Aviv, Israel

Organised by ACE Event Management , UK

The major desalination event of 2010

This is one of the major desalination and water reuse events of 2010, organised by the European Desalination Society, an affiliate of the International Desalination Association. This is the sixth event in the EuroMed series providing an excellent chance for suppliers and service providers to meet professionals, scientists and technologists in all aspects of water desalination and wastewater reuse

This event is now a 'must' for companies providing equipment and services for the sector. In Israel, desalination technology has been developing since the 1960s. Today, some of the largest plants in the world provide water from Ashkelon, Palmachim and Hadera, with more to come on the Mediterranean coastline. Meanwhile, a Jordan-Israel project to bring water from the Red to the Dead Sea is being studied.

The international exhibition accompanying the conference provides an outstanding opportunity for providers of equipment and services in the desalination and wastewater reuse sector to bring these to the attention of a large group of delegates from the Mediterranean region.

Opportunities also exist for additional sponsors for the exhibition and conference, enabling companies to further promote their image in the sector.

Location and cost

The exhibition and conference will be held at the Intercontinental David Tel Aviv in Israel's commercial capital.

Stand prices per square metre including shell scheme* are €435.00 (€370.00 space only). US dollar payments will be accepted at the relevant exchange rate at the time of booking.

*Shell scheme includes table, two chairs, two spotlights, power socket, fascia name, stand cleaning and catalogue entry.

THIS IS ONE EVENT YOU CANNOT AFFORD TO MISS!
