

Euromed 2010

- 1 Carbon footprint analysis of desalination facilities in Israel
Clive Lipchin, Edward Boone, J. Paul Brooks
- 2 Boron removal from seawater by electro-chemical treatment as part of water desalination
Einan Ofir, Asher Brenner, Karren Muuler, Vitaly Gitis
- 3 Solar based distillation system for domestic application in Gaza Strip, Palestine
Ahmed Mohammed
- 4 Membrane era in China water supply: Opportunities and challenge
Liang Heng
- 6 How to design a small SWRO system: California experience
Val Frenkel
- 7 Brackish vs. seawater desalination: How to compare
Val Frenkel
- 9 Decolorization and COD removal of saline brine by a hybride process combining ozonation and membrane filtration
Wen-tao Yi, Chun-yan Yan
- 10 Cost calculation of various capacity electro dialysis plants for the desalination of brackish water
S.K. Thampy, B.S. Makwana
- 13 Selection of optimum formulation for biosorbing lead and cadmium from aquatic solution by using PVA-SA immobilizing *Lentinus edodes* residue
Dan Zhang, Haijiang He, Wei Li, Pei Ma, Dong Yu
- 14 Condition monitoring for membrane systems
Markus Gauder, Senthilmurugan S, Marc Antoine
- 15 Comprehensive investigation of the performance of a novel post-treatment process for desalinated water under various operational conditions
Liat Birnhack, Ori Lahav
- 16 Field results in Namibia and Brazil of the new solar desalination system for decentralised drinking water production
Klemens Schwarzer, Maria Eugênia Vieira da Silva, Tarik Schwarzer
- 17 Cost effective continuous electro-deionization system for the production of ultra pure water
S.K. Thampy, G.R. Desale, B.S. Makwana, P.K. Ghosh
- 18 Silica scaling on reverse osmosis membranes - investigation and new test methods
Wolfgang Hater, Christian zum Kolk, Claire Dupoiron, Gerd Braun, Timo Harrer, Thomas Götz
- 19 Behaviour of pharmaceuticals and drugs of abuse in a drinking water treatment plant (DWTP) using conventional and UF/RO treatments
M^a Rosa Boleda, M^a Teresa Galceran, Francesc Ventura

- 20 Bridging the water gap. A flexible, interim, SWRO desalination solution while major strategic decisions are being planned
Murray Eldridge, David Dwek
- 21 3D physical modelling in a wave flume of brine discharges on a beach
Francisco Vila, Antonio Ruiz-Mateo, Macarena Rodríguez, Manuel Antequera, Ana I. Lora
- 22 Design optimization of large SWRO plants to comply with high quality product requirements
P. Glueckstern, M. Priel
- 23 Control and management of brine disposal for inland desalination plants
Arina Shulman, Inbal David, Elena Gelman, Menahem Priel
- 24 Steady-state mathematical modeling of a solar multi-effect desalination plant at the Plataforma Solar de Almería
Patricia Palenzuela, Diego Alarcón, Julián Blanco, Guillermo Zaragoza, Elena Guillán, Mercedes Ibarra
- 25 Microbial evaluation of sand- and micro-filtration systems as pretreatment for seawater reverse-osmosis desalination using culture-independent analysis based on
Hyokwan Bae, Seongpil Jeong, Heesun Kim, Seockheon Lee
- 26 A brine evaporative cooler/concentrator for autonomous thermal desalination units
Andrea Cipollina, Leonardo Gentile, Giorgio Micale, Lucio Rizzuti
- 28 Comparison of the operation process of an MBR plant with and without chemical optimization
Thomas Wozniak
- 29 Seawater desalination (RO) as a wind powered industrial process - Technical and economical specifics
Joachim Käufler, Klaus Ruediger, Robert Pohl, Hadi Sader
- 30 The role of elastomeric gasket materials in reducing membrane biofouling
Stephen Morrison
- 31 A new phosphorous-free antiscalant for membrane desalination
D.A. Musale, S. Lopes, B.B.J. Yao, M. Fazel, R. Yeleswarapu, A. Hallsby, A. Sheikh
- 32 A new approach for retrofits: Expansion of the Palmachim seawater RO plant
Avner Hermony, Juan Miguel Pinto, Rolando A. Bosleman
- 33 Enhancing performance and flexibility while reducing the environmental impact of seawater RO plant retrofits and expansions with isobaric ERDs
Juan Miguel Pinto, Jeremy Martin
- 34 Effect of dissolved oxygen on the performance of a step-feed hybrid MBR process treating synthetic domestic wastewater
Limei Yuan, Chuanyi Zhang, Rui Yan, Hao Liu, Lijiao Tian, Zhixin He, Yanqiu Zhang
- 37 Removal of Cd (II) from solution by immobilized *Lentinus edodes* residue
Dong Yu, Wei Li, Dan Zhang, Haijiang He, Pei Ma, Yang Cao
- 38 Coagulant optimization test for the membrane pre-treatment process in desalination
Seongpil Jeong, Yonghae Park, Seockheon Lee

- 39 An experimental approach to explore antifouling- and cleaner-systems for desalination membranes
Markus Rückel, Stephan Nied, Gregor Schürmann
- 40 Biofouling control in Industrial RO systems using early warning fouling sensors and biocidal agents
Marcel J. Boorsma, Simon Dost, Sjack. Klinkhamer, Jan C. Schippers
- 41 Operation of BWRO plants at extremely high recovery levels
A. Drak, J. Brechman, M. Adato, I. Wexler, D. Lisitsin
- 43 Five years of operational experience in the world's largest SWRO desalination plant
Verónica García Molina, Micha Taub, Leon Yohay, Markus Busch
- 44 Long-term preservation of reverse osmosis membranes with non oxidising biocides — comparison with SMBS treatment
K. Majamaa, U. Bertheas, R. Levy, F. Finlayson
- 45 The use of computer aided techniques for RO desalination layout design
Amos Bick, Gideon Oron
- 46 Pharmaceuticals and illicit drugs in municipal wastewater and assessment of removal with reverse osmosis treatment
K. Majamaa, V. Gomez, M^a R. Boleda, M^a T. Galceran, F. Ventura
- 47 Technical-economical evaluation of the operation of a solar-powered NF desalination plant for sustainable agriculture
Andrea Ghermandi, Avraham Kudish, Rami Messalem
- 48 Physical fouling control in forward osmosis membranes for wastewater reuse
Youngbeom Yu, Sunkeun Seo, Seokheon Lee
- 49 Membrane processing of biodiesel wastewater for possible reuse
Amarnath Narayana, Pradosh P. Chakrabarti, Vijay Kale
- 50 Low cost municipal wastewater reuse in Mediterranean regions
D. Falsanisi, R. Gehr, L. Liberti, D. Santoro, S. Sasso, H. Shuval
- 51 A novel technology to treat sewage water for energy recovery and water reuse
Dawen Gao, Rui An
- 52 Meso-structured and amorphous zirconium phosphate for efficient removal of fluoride
R.K. Dey, S.K. Swain, Tanushree Patnaik
- 53 Pressure vessel for 16 and 18 inch RO membranes
Tobias Haarbuerger, Nadav Shachaf
- 54 Capacitive deionisation of water solutions
Yu.M. Volkovich, D.A. Bograchev, A.Yu. Rychagov, D. Park
- 55 Improved aquifer characterization and the optimization of the design of brackish groundwater desalination systems
Robert G. Maliva, Thomas M. Missimer
- 57 Research on pre-denitrification double-layer media biological aerated filter in municipal wastewater treatment
Hong-bo Hu, Hong-jun Han, Yu-fei Li, Bing Wang

- 59 Biofouling formation in membrane systems; biocides and complementary treatments for biofouling control: techniques to monitor biofilm growth
Sylvie Haugeard
- 60 A new approach to handle sewage and other pollutants
Dan Zaslavsky
- 61 The potential of a natural wetland for grey water treatment: a case study in Cape Coast, Ghana
A.E. Duncan, Esi Awuah, D.K. Dodoo, Nana O.B. Ackerson
- 62 Removal of chromium (VI) from aqueous solutions using an alga: *Spirulina platensis*
Uzma Nadeem, V.S. Tripathi, M.C. Chattopadhyaya
- 64 Pilot plant for domestic effluent filtration and desalination for sustainable effluent utilization
Ilan Katz, Raphael Semiat, Carlos Dosoretz, Nir Goldshtein, Josef Hagin
- 65 Techno-economic analysis of combined concentrating solar power and desalination plant configurations in Israel and Jordan
Ralf Olwig, Tobias Hirsch, Heike Glade, Louisa Schmeken, Stefan Will, Andrea Ghermandi, Rami Messalem
- 66 Capture of evaporated water
Gabriel Jinjikhashvily, Dror Yitzhak, Danny Sherban
- 67 Environmental research on brine discharge optimizing: a case study approach
Encarna González, Beatriz Arconada, Patricia Delgado, Ana Álvarez, Manuel Antequera, Yolanda Fernández, Aurora Garrote, Sergio de Rico, Eduardo Salate
- 68 Material selection and corrosion in seawater reverse osmosis desalination plants
Nicolas Larché, Philippe Dézerville
- 69 Influence of modified montmorillonite on the process of baromembrane purification of water from uranium(VI)
Lyudmila Yurlova, Antonina Kryvoruchko
- 70 Effect of water state in membranes on heavy metals transmembrane transfer
Irina Romaniukina, Irina Atamanenko
- 71 Effectiveness of treatment of wastewaters with chemisorption composite materials «Polycon»
M.M. Kardash, G.V. Aleksandrov
- 73 Separation characteristics of acetone/water mixtures through sodium alginate/poly(vinyl pyrrolidone) membranes by vapor permeation and vapor permeation with
Ebru Kondolot Solak, Suat Kahya, Oya Şanlı
- 74 Successful antiscalant field trial - Optimization at higher pH and seawater temperature. Larnaca Desalination Plant
Filip Dutoy, Wiebo van der Wal
- 75 Green solutions for a thirsty world
Perry Mehta, Dianne Peck
- 77 Filtration resistance of foulant layers containing transparent exopolymer particles (TEP) during membrane filtration
Loreen O. Villacorte, Maria D. Kennedy, Gary L. Amy, Jan C. Schippers

- 79 Study on the impact of particle size distribution on turbidity in water
Weipeng He, Jun Nan
- 80 Characteristic analysis of morphological evolution of suspended particles in water during dynamic flocculation process
Jun Nan, Weipeng He
- 81 Experimental results of seawater distiller utilizing waste heat of portable electric generator
Chang-Dae Park, Byung-Ju Lim, Kyung-Yul Chung
- 82 Desalination for the City of London
Frans Knops, Julio Zorilla
- 83 Removal of heavy metals by immobilized magnetite nano-particles
Adva Zach-Maor, Raphael Semiat, Hilla Shemer
- 84 The effect of solids retention time on the adherence, viscoelastic properties, and fouling propensity of extracellular polymeric substances in a membrane bioreactor
Amer Sweity, Wang Ying, Gideon Oron, Moshe Herzberg
- 85 Effect of coal gangue-flyash ceramic (CFC) media on municipal wastewater treatment in a pre-denitrification biological aerated filter
Hongjun Han, Hongbo Hu, Yufei Li, Bing Wang
- 86 Commissioning of the Gold Coast plant - lessons learned
Thys McCurdy, Fred Grondhuis
- 87 Project for the development of innovative solutions for the brines from desalination plants
Domingo Zarzo Martinez, Elena Campos Pozuelo
- 88 AirLift MBR for municipal wastewater treatment: Lower TCO through higher flux and lower footprint
Harry Futselaar, Rob Borgerink, Patrick van Lierop, Rick Rosberg
- 89 AquaFlex LS for potable and process water treatment: high flux coagulant-free ultrafiltration
Harry Futselaar, Bastiaan Blankert, Frederik Spenkelink, Rick Rosberg
- 90 Algae removal by combination of ozonation and coagulation
Hailong Liu
- 91 Ozone-membrane hybrid process for arsenic removal in iron containing water
Joon-Wun Kang, Yeo-Joon Yoon, Yun-Young Hwang, Min-Kyu Ji, Byong-Hun Jeon
- 92 Effect of coagulation on phosphorus distribution in water
Hailong Liu, Xia Zhao, Ruyuan Jiao
- 93 Researching and modelling the dependence of MD flux and energy efficiency on membrane dimension for scale-up purpose
Jianhua Zhang, Jun-De Li, Stephen Gray
- 94 A dynamic model for the control of a seawater reverse osmosis desalination process
Young Geun Lee, Adrian Gambier, Essam Badreddin, Joon Ha Kim

- 95 Optimisations of Multibore ultrafiltration membrane characteristics for wastewater reuse applications
Martin Heijnen, Peter Berg
- 96 RO train designs in the last years: Evolution of energy consumption and future trends
Rafael Buendia, Aitor Diaz, Carlos García, Domingo Zarzo
- 97 Influence of structure and chemical nature of a surface of membranes on their functional characteristics at nanofiltration of artesian waters with increased carbonate
Vladislav Goncharuk, Alina Kavitskaya, Irina Atamanenko, Marta Skilskaya, Tatyana Yakymova
- 98 Distributed generation and water production: A study for a region in central Italy
Luca Cioccolanti, Gabriele Comodi, Torquato Nanni, Stefano Palpacelli, Alberto Tazini
- 99 The effect of pH on the adherence and fouling propensity of extracellular polymeric substances in a membrane bioreactor
Amer Sweity, Wang Ying, Gideon Oron, Moshe Herzberg
- 100 Desalination devices for arid areas
Leon B. Begrambekov, Alexey A. Gordeev, Sergey V. Vergasov, Andrey.M. Zakharov
- 101 Transparent exopolymer particles, microbial shuttles expediting biofilm formation in desalination facilities
Edo Bar-Zeev, Ilana Berman-Frank, Natasha Belkin, Tom Berman
- 102 The effect of UV pre-treatment on biofouling of BWRO membranes: A field study
Tali Harif, Hila Elifantz, Eli Margalit, Moshe Herzberg, Dror Minz
- 103 Heat recovery in multi-effect distillation by different heat pump technologies
Andreas Trostmann
- 104 Mixed salt scaling in horizontal tube falling film evaporators under various process conditions
Heike Glade, Kerstin Krömer, Stefan Will, Stephan Nied, Jürgen Detering, Gregor Schürmann
- 105 Large ultrafiltration system for industrial waste water re-use in Turkey
Martin Koenig, Norbert Selzer, Bodo von Harten
- 106 Carbon footprint of seawater reverse osmosis pre-treatment: A computational tool
Matan Beery, Adam Hortop, Frans Knops, Jens-Uwe Repke
- 107 Balancing water demands with supplies: The role of a systematic approach to water usage management in a Mediterranean brewing industry
J.A. Tavares, A.M. Oliveira, E.A. Duarte, P.G.S. Godineau
- 109 7 years operation of BWRO plant with raw water from coastal aquifer for agriculture irrigation
Carlos García, Francisco Molina, Domingo Zarzo
- 110 Initial pilot data from 120 m³/d flow reversal pilot plant operating on brackish well water
J. Gilron, Y. Goldkine, G. Mizrahi, N. Daltrophe, E. Korin, D. Peled, N. Perlmutter, Y. Gelman, I. Ben-David, M. Priel, Y. Lu, F. Kujundzic, A. Greenberg

- 111** RO-ED-UF-WAIV hybrid for near-ZLD brackish water desalination
J. Gilron, N. Daltorpe, E. Korngold, L. Katzir, R. Messalem, Y. Volkman, M. Waismann, Y. Oren
- 112** Field experience with a 20,000 m³/d integrated membrane seawater desalination plant in Cvrus
Eduard Gasia Bruch, Peter Sehn, Markus Busch, Verónica García Molina, Simon Urruhart, Ofer Raiza, Miro Negrin
- 113** Microbial diversity and biofilm formation on the membrane in membrane distillation system operating on seawater over an annual cycle
M. Krivorot, A. Kushmaro, Y. Oren, J. Gilron
- 114** Improved simulation and validation of multi-effect desalination plants with thermal vapor compression
Myunghoon Seong, Andrea Vozar, John Georgiadis
- 115** The effect of surface organic functional groups on calcium phosphate mineralization in membrane-based water treatment systems
Zvi Steiner, Hanna Rapaport, Yoram Oren, Roni Kasher
- 116** Falling film parallel plate heat exchangers for MED: Pilot study
Andrea Vozar, Marios Georgiou, Myunghoon Seong, John Georgiadis
- 117** Mineral scaling of RO membranes in the presence of biofilm
Ronit Arbel, Nancy H. Lin, Eric Lyster, Jack Gilron, Yoram Oren, Yoram Cohen
- 118** Eliminating arsenic from RO concentrates by the reuse of anion exchange resins
Zakhar Maletskyi, Tetiana Mitchenko, Nataliia Makarova, Elena Shevchuk
- 119** Cost-effective seawater desalination technology based on reuse of municipal water
Fredg Fendri, Tetiana Mitchenko, Zakhar Maletskyi
- 120** Comparison of different pretreatment for seawater desalination
Seung-Hyun Kim, Choong-Sik Min, Jaeweon Cho
- 121** Optimum backwash method for dual media filtration of seawater desalination: experiment and modeling
Seung-Hyun Kim, Hwan-Kyu Lim, Woo-Chang Jeong, No-Suk Park
- 122** Development of large scale microbial fuel cells for wastewater treatment
Ronen Shechter, Eytan Levy, Lior Eshed
- 123** Thermodynamic behaviour of a multi-effect distillation experimental unit with horizontal-tube falling film evaporation
Luopeng Yang, Shengqiang Shen, Huawei Hu
- 124** Utilizing the flexibility of RO system configuration
Val Frenkel, Mark Wilf
- 125** Economic feasibility study of cases on seawater desalination systems coupling to a low temperature nuclear heating reactor
Li Tian, Jilin Guo, Li Cao, Yongqing Wang
- 126** Design optimization of large SWRO plants utilizing time-of-use (TOU) energy prices
Pinhas Glueckstern, Deborah Anahory

- 127 On uncertainties in the design of multiple-effect distillers
Louisa Schmeken, Katharina Boeck, Heike Glade, Stefan Will
- 128 Improved phenol degradation in high-phenol-fed MBR by membrane-driven containment of non-settling biodegradation microbes
Soojeung Ahn, Insang Song, Younkyoo Choung, Joonhong Park
- 132 Decreasing seawater reverse osmosis energy cost by improved membrane rejection and active area
Veronica Garcia-Molina, Markus Busch
- 133 Energy recovery devices for very low sea water capacities desalination plants
B. Peñate, J.A. de la Fuente, V. Subiela, G. Melián
- 134 Physical modelling of Venturi eductors compared with conventional diffusers in brine discharges
Ana Álvarez García, Elena Consuegra Alcalde, Manuel Antequera Ramos, Ana Lloret Canote, Antonio Ruiz Mateo
- 135 Low electrode area electrochemical scale removal system
David Hasson, Georgiy Sidorenko, Raphael Semiat
- 136 Humic acid removal by deep-bed filtration and by UF membranes
Iris Sutzkover-Gutman, David Hasson, Raphael Semiat
- 137 Introducing "New Water" and their combination with the "Carrying Capacity" of the natural water resources of Israel as a test study
Mo Provizor, Denis Gamazin
- 138 An analytical study of falling film outside a horizontal tube
Luopeng Yang, Chen Xue, Huawei Hu
- 139 Effect of the concentration polarization on the fouling driving force in UF membranes
Sonia Vulf, Iris Sutzkover-Gutman, David Hasson, Raphael Semiat
- 140 What do we know about TEP in the formation of aquatic biofilm?
Tom Berman, Roi Mizrahi, Edo Bar Zeev, Ilana Berman-Frank, Carlos Dosoretz
- 141 Pretreatment options to reduce biofouling potential in seawater reverse osmosis systems: A comparison of metal based and biopolymeric coagulants
S. Assiyeh Alizadeh Tabatabai, Jin Wei, Maria D. Kennedy, Gary L. Amy, Jan C. Schinner
- 142 Correlation of CaCO₃ induction times measured by an electrochemical technique
Irina Zaslavski, David Hasson, Hilla Shemer, Raphael Semiat, Mark Wilf, Craig Bartels
- 143 Preliminary assessment of a solar energy driven membrane distillation system
E. Guillén, J. Blanco, D. Alarcón-Padilla, G. Zaragoza, P. Palenzuela, M. Ibarra
- 144 The effect of wind speed fluctuations on the performance of a directly-driven nanofiltration/reverse osmosis membrane system
Gavin L. Park, Andrea I. Schäfer, Bryce S. Richards
- 145 The water crisis in the Gaza Strip
Fadel Kawash

- 146 Evaluation the performance of small scale desalination plants in Gaza Strip
Abdelrahman Tamimi
- 147 Water Master Plan for the Middle East 2040
Shimon Tal
- 148 Renewable desalination: Private Public Partnership policies to encourage development of sustainable desalination in the Middle East
Corrado Sommariva
- 150 Optimal use of membrane processes for treating wastewater reused in cooling towers
Daniel Hoffman, Amnon Zfati
- 151 Cake formation and cake compression effects during constant flux filtration applied to the Modified Fouling Index ultrafiltration (MFI-UF)
Sergio G. Salinas Rodríguez, Didik Wahyudi, Maria D. Kennedy, Gary L. Amy, Jan C. Schinnerer
- 152 The contribution of air valves installations to a wide variety of problems in desalination plant
Ami Farhi
- 153 An activated sludge model (ASM) with the phase field model in wastewater treatment
Yasuo Obikane, Shigeru Ikeo, Naoki Takada
- 154 Photovoltaic reverse osmosis – Feasibility and a pathway to develop technology
Amy M. Bilton, Leah C. Kelley, Steven Dubowsky
- 155 Desalination of seawater – Aspects of environmental law
Tzvi Levinson
- 156 Polishing of secondary treated effluent for sustainable use in agricultural irrigation: Evaluation of UF-RO and slow sand filters
Rashed Al-Sa'ed, Mustafa Khamis, Adnan Manassra, Majdi Dakiky
- 157 Pre-desalination with electro-membranes for SWRO
J.W. Post, H. Huiting, E.R. Cornelissen
- 158 The value of water: Optimizing models for sustainable management , infrastructure planning. and conflict resolution
Franklin Fisher, Annette Huber-Lee
- 159 Remineralisation of desalinated water of Laayoune RO plant by lime saturator
F. El Azhar, N. Zouhri, S. Ait Habziz, M. Hafsi, S. Belhamidi, M. Taky, A. Elmidaoui
- 160 Closed circuit desalination – a new low energy high recovery technology without energy recovery
Avi Efraty, Ran Natanel Barak, Zviel Gal
- 161 Characterisation of NF-2 membrane modified with alkoxysilanes
M. Bauman, A. Lobnik A. Kosak, I. Petrinic, T. Luxbacher
- 162 Desalination as a key component for the southern Israeli coastal aquifer rehabilitation and restoration plan
Adva Avital, Svetlana Lumlesky, Derek Moss, Israel Gev, Ido Negev, Hagit Oron

163 A new approach for a membrane pre-treatment process in desalination using electrochemical reactors
David Sherzer
