

Vacancy: Project Engineer

OSMO SISTEMI S.R.L., Italy a member of the Caramondani Group of Companies is seeking a Project Engineer for the Company's Italy-based Water Treatment manufacturing Plant in Fano with minimum 3 years post graduate water treatment process experience including a minimum of 2 years capital project consulting experience.

Job Role

Direct and manage all aspects of individual multi-discipline Engineering, Procurement and Construction of water treatment projects from inception to completion.

Key Duties and Responsibilities

- Prepare bid packages based on tender specifications for complex, water treatment focused projects.
- Prepare engineering calculations, technical proposals, process flow and layout diagrams, and construction drawings.
- Specify water treatment equipment and systems, and review equipment specifications and bid packages.
- Oversight of the development of a plant during construction.
- Collaborate with colleagues, engineers, designers and administrative staff supporting their assignments.
- Interface with key client and project staff in project team meetings.
- Plan, organize and control all aspects of projects including proposals, studies, detailed designs and construction and commissioning support.
- Provide clients with assistance during installation, start-up, commissioning and during after sales service on purchased equipment and related systems.

Qualifications and Experience

- A Mechanical, Chemical, Electrical, Civil or Industrial Engineering related degree
- 3 years post graduate experience including a minimum of 2 years capital project consulting experience in manufacturing or chemical process industries. Experience with primary water treatment process, piping systems and chemicals for water treatment processes will be considered an advantage.
- Ability to apply engineering techniques commonly used in industrial capital projects
- Ability to identify, interpret, and apply relevant knowledge, codes and standards to engineering designs, meeting industry design norms, standards of care and client expectations.
- Excellent written and verbal communication skills in English language. Knowledge of Italian and/or French will be considered an advantage.
- Excellent organizational and managerial skills are a basic prerequisite.
- Demonstrated ability to prepare technical proposals and engage in business development opportunities, and ability to manage client relations.
- Working knowledge of Microsoft office software including spreadsheets and word processing. Knowledge of AutoCAD will be considered an advantage.
- Candidate will be required to travel to Europe, Africa and Middle East.

Remuneration package

Competitive remuneration will be offered depending on qualifications including set monthly compensation and a relocation expenses package.
