

Desalination for the Environment: Clean Water and Energy
Alfândega Congress Centre, Porto, Portugal
27–30 April 2025

CONTENTS

Preface

J.G. Crespo (Portugal)	vii
PRE-1900 solar distillation in present-day Namibia	
J. Birkett (USA)	1
Techno-economic analysis of solar and wind powered desalination to meet the water needs of hundred homes in Karachi, Pakistan	
Q. Abbas, H.M. Ali, A.B.S. Alquaity, A. Al Miaari (Saudi Arabia)	7
Desalination in Algeria: a major challenge to guarantee water security	
N. Drouiche, S. Hennane, R. Youcef, H. Lounici, A. Kettab (Algeria)	16
Dakhla desalination plant using renewable energy	
L. Hasnaoui, M. Ouhsain (Morocco)	23
The selection of nanofiltration membrane characteristics to purify landfill leachate and reduce concentrate	
A. Pervov, V. Dzyubenko, T. Shirkova (Russia)	30
Innovative procedure of chemical cleaning for RO membranes to reduce the energy consumption in the operation of a BWRO plant	
A. Casañas González, A. Ramos Martin, F. Leon Zerpa (Spain), N. Chirinzá (Mozambique)	45
Wastewater treatment membranes: Main issues and failures	
N. Peña García, J. Rodríguez Gómez, F. del Vigo (Spain), A. Shankhe (USA)	51
Control biofouling through membrane flux balance by interstage boosting	
H. Abdelfatah (USA)	63
Desalination without chemicals: Bonaire's modular plant and the application of direct osmosis cleaning (DOC)	
I. Sutzkover-Gutman, I. Zaslavski (Israel)	72
Cutting-edge technology for the selective separation of monovalent salts from seawater brine	
N. Chehab, N. Voutchkov, M. AlSindi (Saudi Arabia)	79
Waste to Value — A pilot demonstration and economic analysis of vaterite calcium carbonate production using brine, CKD, and CO ₂	
Seungwon Ihm, A.S. Abdalrhman, M. Al-Talibi, O. Al-Raqibah, A. Alnumani, E. Alwaznani (Saudi Arabia), Youngho Lee, Kichul Park, Jinuk Heo, Won Jo, Sehun Kim, Myoung-Jin Kim (Korea)	86
Revolutionizing 3D printing with brine valorization	
M. Alsindi, N. Chehab, S. Arab, N. Voutchkov (Saudi Arabia)	98

Development of reverse osmosis technology and opportunities for renewable energy integration in the Greek islands E. Tzen, E. Rikos, I. Karga, P. Papadopoulos, N. Stefanatos, D. Theofiloyiannakos (Greece)	104
Solar-powered barometric vacuum desalination: modelling, simulation, and performance analysis for sustainable water production S. Own, A. Nasser, H. Iacovides (UK)	114
Impact of fouling on the performance of solar-driven multi-effect desalination systems J. Hajaji (Saudi Arabia), P. Palenzuela (Spain), M.A. Antar (Saudi Arabia)	120
Performance assessment of an existing multi-effect desalination system driven by solar energy B. Shahzamanian Sichani, S. Varga (Portugal), D. Alarcón-Padilla (Spain)	125
Dual benefits of immobilized carbonic anhydrase: Enhancing water quality and reducing carbon footprint in desalination processes J. Rubel, D. Madhav, V. Vandeginste, P. Tob (Belgium)	130
On-site demonstration of a robust rotary energy recovery device F.G. Ladisa, J. De Salas, V. Ruiz (USA)	137
FLEX™: A new era of isobaric energy recovery devices for seawater reverse osmosis F.G. Ladisa, E. Jankel, B. Wanvik (USA)	142
Brine utilization for blue energy generation: Life HyReward project C. Calvo Barahona, P. Terrero Rodríguez, S. Pastor González (Spain), S. Grasman, H. Swart, F. Scheepers (The Netherlands), D. Zarzo Martínez (Spain)	147
A review of stormwater infiltration processes and applications in the Gaza Strip before 2023 Z. Helles (Canada), Y. Mogheir (Palestinian Authority)	158
Author Index	188
